Technical Skills

Skills

- Javascript
- Typescript
- React
- Nextjs
- Sql
- ASP.NET Core

- Nuxtjs
- Vuejs
- Tailwind Css
- Bootstrap
- Nodejs
- Sequelize

Tools

- PostgreSQL
- Toad
- Postman
- Bruno
- Git

Education

2025 Naresuan University

Faculty: Engineering

Degree: Bachelors Degree

Major: Computer Engineering

Work Experience

Bangkok Software co. Ltd | Programer

Virtual School | Nuxt.js, Node.js, Oracal Sql

1 May - 31 Apr 2025

- Developed an online learning system featuring pre-tests, post-tests, and final exams with automated grading and performance evaluation.
- Implemented a learning analytics feature to identify students' strengths and weaknesses, offering personalized recommendations to bridge knowledge gaps.
- Built an assignment submission system for instructors and students to manage coursework efficiently.
- Integrated a session management security feature to prevent concurrent or duplicate logins.
- Optimized application performance to concurrently support up to 1,000 active users.

Car-Service | Nuxt.js, Node.js, Oracle SQL

- Created a vehicle inspection and tracking system requiring multi-photo verification (radiator, battery, engine oil, and full vehicle layout) before use.
- Designed forms for logging employee ID, vehicle license plate, and initial mileage reading prior to vehicle dispatch.
- Integrated GPS tracking functionality to monitor vehicle locations and route history.
- Developed a Line Chatbot automation that parses vehicle checkout data and instantly broadcasts confirmation details with verified photos into a Line group.

E-testing | Nuxt.js, Node.js, Oracle SQL

- Built a comprehensive examination system allowing instructors to create custom exams or select questions from a centralized database.
- Designed flexible exam management configurations, including question sets, student/class enrollment restrictions, scheduling, and strict time limits.
- Supported multiple question formats such as multiple-choice, subjective/essay, true/false, and matching questions.
- Implemented a student login portal secured with concurrent login prevention to ensure test environment integrity.

UNISOFT Co., Ltd. | Full Stack Developer Intern | React, .Net Core, Sql Server ,Docker 1 Apr - 15 JUN 2024

Worked on web application development with a focus on making the system easy to use and reliable

- Designed and implemented RESTful APIs using MVC architecture with proper validation and error handling
- Designed and managed a relational database schema using SQL Server, ensuring data consistency and performance
- Developed a user-friendly web interface to enhance accessibility and user experience

Freelancer | YouTube Premium Subscription | Vue.js, Node.js, Sql Server

- Developed a seamless subscription purchasing platform integrated with Line, redirecting users to a web portal for secure checkout.
- Implemented four distinct subscription models: Solo Stock Email, Family Stock Email, Personal Email Solo Activation, and Personal Email Family Invite.
- Designed a flexible, month-based pricing engine allowing users to choose subscription durations according to their preferences.
- Integrated hybrid payment processing gateways, supporting both automated Stripe Payment and QR code uploads with manual slip verification.
- Built a Line Chatbot notification system that automatically delivers purchased account credentials, order confirmations, and promotional updates.
- Programmed an interactive FAQ chatbot within Line to automate customer support and handle common user inquiries.

Capstone Project | React, TailwindCSS, Express, Sequelize ORM

"Comprehensive Data Management and Poverty Reduction Platform"

- Developed a centralized web platform for managing and analyzing regional poverty data across Phitsanulok Province.
- Integrated LINE OA (Messaging API & LIFF) with dynamic Rich Menus and Webhooks for household status tracking.
- Designed interactive SVG maps and Longdo Map GIS to visualize real-time poverty statistics and household locations.
- Created an Executive Summary Report feature allowing users to export filtered data for strategic decision-making.
